DETAILED ACTION

Claim Rejections – 35 USC 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - a. In claim 1, the phrase 'longer period' is indefinite. Longer lacks a requisite degree.
 - b. In claim 1, the phrase 'much variation' is indefinite. Much variation lacks a requisite degree.

Claim Rejections – 35 USC § 103(a)

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hiesinger (U.S. 4,151,321).
5. Hiesinger discloses a light absorbing (column 8, lines 23-26) and emitting structure (column 5, lines 65-68) comprising a transparent glass substrate (column 6, lines 3-5). Hiesinger also discloses light absorbing granules which are colored (column

2, lines 56-61). Because the granules are colored, it would have been obvious to one of ordinary skill in the art to mix the granules with ink because mixing color with the granules is essentially analogous to mixing ink with the granules. In claim 1, 'granules which are well mixed together to a composition for making articles with desired shapes' is a product by process claim limitation. "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." *In re Thorpe*, 777 F.2d 695, 698, 227 USPQ 964, 966.

Claim Rejections – 35 USC § 103(a)

6. Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakai (U.S. 6,146,548).

7. Sakai discloses a light absorbing and emitting composition (column 1, lines 59-61 and column 3, lines 63-64) comprising a transparent component that is mixed having granules of light storing materials (column 4, lines 1-2). In claim 1, 'granules which are well mixed together to a composition for making articles with desired shapes' is a product by process claim limitation. "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the

product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Palazzotto et al. (U.S. 6,017,660) discloses a light absorbing composition (column 1, lines 48-49 and column 14, lines 20-21) comprising granules (column 12, lines 8-13).
